Downloading Digital Membership Cards

In 2020 Cycling Australia stopped issuing membership cards for licencing moving to a digital licence, below are the steps to add a digital licence to the iPhone Wallet app or Google Pay App.

Please Note: These instructions are intended for Apple iPhone Users; however, the steps are very similar on an Android Device.

In the future we intend on moving to a system which requires riders for racing and training that they formally sign in using their membership cards so that we can verify that riders have the correct licence and therefore insurance to cover the club and rider should an accident occurs.

1. Login to the following website (cycling.tidyhq.com) with the email address and password created when you signed up for your Cycling Australia Membership.

    If you don't know what your password is it can be reset online from the login page, if you don't know what email address you used please see an executive member of the club who should be able to look it up for you.

2. Select Menu in the top left-hand corner and click on memberships.
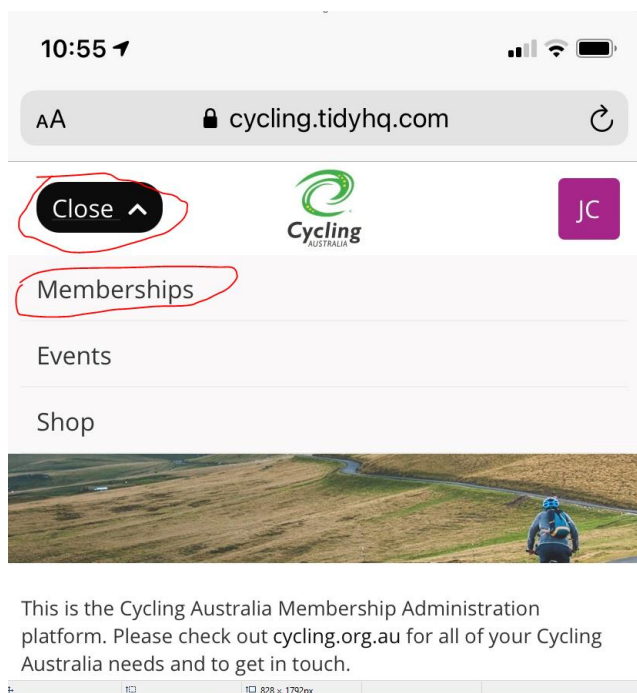

3. Find your current active membership in the list and click on Add to Apple Wallet, or if you have an Android Device select the "Gpay Save to phone" option.
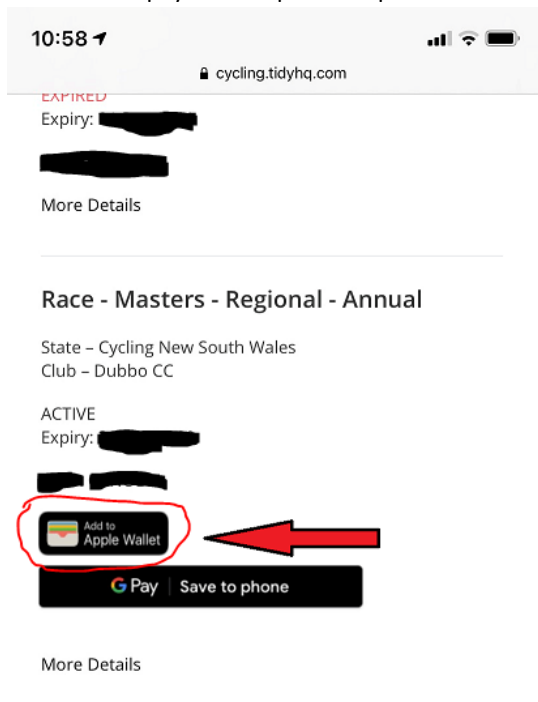

4. Your card will show up, to add it to the Wallet app on your iPhone or Google Pay App on Android Phones, click on Add in the top right-hand corner.

5. Open the Wallet app and your card will show alongside any cards you have added to Apple Pay. (Please Note: we do not have the ability to use Apple Pay to pay for race entries or canteen purchases currently).
